## PROJECT(S)

### Vihar – Temple Guide for Devotees

### Tech Stack: HTML, CSS, JavaScript, Python (Flask)

Web application to serve as a digital guide for temple visitors. The platform allows users to explore temple details, view spiritual content, and navigate through a clean, responsive UI. Used Flask to handle routing and dynamic content rendering. Designed the frontend using HTML, CSS (with Tailwind), and JavaScript for interactivity. Employed modular architecture to manage user interactions, form submissions, and page navigation.
